

Be a "Top 10"

Billboard Artist!

Automobile traffic causes many problems in our region. Car exhaust causes pollution. It makes our air dirty and can cause breathing problems for people. Oil can leak from cars and pollute the water, harming the fish and plants. One way to reduce pollution is to use public transportation. You can use buses, trains and ferries to travel. It's better for the environment and we don't have to sit in traffic!

Directions: Create a billboard. Draw a picture or write a message to convince people they should use public transportation.
