EXHIBIT "1"

MEMORANDUM: PURCHASES GREATER THAN \$25,000
DELAWARE RIVER PORT AUTHORITY
of Pennsylvania and New Jersey

TO: James White, Chief Financial Officer
John T. Hanson, CEO-DRPA/ President-PATCO

FROM: Michael Venuto, Division Director/Project Manager: Engineering

SUBJECT: SOLE SOURCE APPROVAL - MISTRAS Group, Inc.

PURCHASE REQUISITION: [Redacted]

DATE: Thursday, May 19, 2016

Background:

The main suspension cables of the BFB are monitored for potential wire-breaks using acoustic emission technology developed and installed by MISTRAS Group (formerly Physical Acoustics). The system was originally installed in 1999 and upgraded in 2006. The wire break data is used to update factor of safety calculations to ensure cable capacity and reliability are adequate.

Justification for Proprietary/Sole Source:

MISTRAS is an industry-leading provider of technology-enabled systems used to monitor critical public infrastructure assets. The equipment was installed by MISTRAS many years ago and has been monitored by MISTRAS ever since. The system is an on-line monitoring system that provides secure web-based remote or on-site acoustic monitoring, real-time reports, and analysis of data. There are other vendors that provide this type of service but none are capable of monitoring and maintaining the existing system because of the proprietary nature of the equipment and software.

Cost:

Acoustic emission monitoring and maintenance of the system for a 12 month period starting Feb 2016.
Total = \$27,000
